

[THE MPH EFFECT]

The MPH Effect results from Manlius Pebble Hill's one-of-a-kind combination of academics, culture, and community, which shapes exceptionally bright, conscientious, self-directed young scholars and citizens. These statistics are impressive, but more important are the qualities that take root here and allow our students to flourish throughout their lives. Our graduates think critically, act responsibly, and have a passion for lifelong learning. **Attend one of our "Discover MPH" open house events and see for yourself.
