

# Mad Scientist Class

Grades K - 5

Mondays, 3:30-5:00

January 28 – March 4 (no class Feb. 18)

Fee: \$155 includes all supplies

In this 5-week session, we will build a different motorized LEGO model each week, and we will also complete science experiments! (Erupting volcanos, making slime and more!) Each student brings home a customized mini-figure they build from our Bricks 4 Kidz mini-figure factory.

In all Bricks 4 Kidz after school enrichment classes, we Learn, we Build and we Play ... with LEGO Bricks! Through an interactive STEM PowerPoint lesson and by building with our specialized technic LEGO® kits, kids will begin to identify and understand early engineering principals.
