

AP Biology:

For your summer assignment, read the book “The Serengeti Rules” by Sean B. Carroll. Inquire at the upper school office on how to get your book, or you may purchase your own copy. Read the book, including the Introduction and Afterword. There are 10 discussion questions linked in the document below, one for each chapter. I suggest you read the chapters one at a time and answer each chapter question immediately after reading. You may answer your questions by making a copy of the google doc and writing right in the document, or you may print out this packet and hand write your answers as well. Please note that any questions that ask you to “sketch” or “draw” or “graph” must be done by hand. You must be logged in with your school account to view the document. All 10 questions and answers will be due on the 2nd day of class. If you have any questions, please email me at ayeager@mphschool.org.
