MPH Phase 2 Travel Protocols

(Updated 1/21/21)

The Pandemic Response Team continues to monitor closely COVID-19 positivity rates and changes in the virus that can increase its transmissibility. In response to these changes, we have updated our Travel Protocols for Phase 2 of the global pandemic emergency.

Travel, even within our state, can increase your chance of spreading and getting COVID-19. **Staying home is the best way to protect yourself and others from COVID-19.**

If you must travel, please review these helpful [CDC safety measures for travelers](#) and review carefully these updated travel protocols, noting that **MPH's protocols remain more stringent** than the protocols outlined by New York state.

PHASE 2 Update: Any MPH student or employee who travels outside the state of New York for longer than 24 hours is required to *either*:

- Quarantine for 14 days upon their return to New York
- OR
- Provide to Nurse Christine Civello the results of BOTH of the COVID-19 tests that are required by the state to “test-out” of the mandatory quarantine period. You may find details of these requirements in the [NYS COVID-19 Travel Advisory](#).

Note: New York State's exemption of contiguous states exists for economic reasons and does not apply to MPH's objectives of safeguarding the health and well-being of our whole community. MPH strongly urges travelers to and from contiguous states to follow the same protocols as travelers from other states.
