

Biology
Summer Enrichment 2022
Dr. Bonacorsi

There is no *required* work for 9th grade Biology. If you would like to complete summer Biology enrichment, you may choose to read *Braiding Sweetgrass* by Robin Wall Kimmerer. We will be reading selected chapters for assignments during the school year, but we will not read the entire book. If the book looks interesting to you, it is definitely worthwhile to read it cover to cover! If not, there will be time during the school year devoted to the sections we will study; you will not be behind in any way if you choose not to read the book over the summer.
